AIRPUR DUCT

Eliminator of odours for air conditioning circuits

Properties:

AIRPUR® Duct is a product specially formulated to eliminate the bad odours from the fermentation of metabolites and microorganisms lodged and produced by the thermal changes in ducts, batteries, split systems, environment, etc. of the air conditioning equipment. Its excellent efficiency makes it a necessary and essential product for all the air duct systems, avoiding the proliferation of bad odours and eliminating them.

Each container has a treatment effectiveness of 14 m2 of duct surface (equivalent to an inhabitable area of 100-120 m2).

Applications & instruction for use:

We introduce **AIRPUR® Duct** "total discharge" within the duct through the return grille or else in the air inlet of the machine (removing the filters if possible and cleaning them with our product **AIRNET® disinfectant** before putting them back in place). We will turn the system on in the cold mode and minimum power, close doors and exterior windows, press the aerosol actuator until the product has a continuous outflow. We will also apply it to through the air outlet grilles, in this case with the system stopped. Once the application is finalised, we will place a plastic on the grille to produce the airtightness of the **AIRPUR®** for its best effectiveness.

We let it work for 15 minutes so that the product circulates well through all the ducts of the air conditioning system. Ventilation is recommended before entering.

Type of packaging:

100 ml spray.

Physical Properties:

Appearance - Spray

Colour - Light

Odour - slightly perfumed

Weight - Min. 101 gr. / Max. 104 gr.

pH 100% - 11,4

Qualitative Composition:

- Metal oleates
- Quaternary ammonium salts
- Alcohol

WARNINGS:

The suggestions and recommendations on the use of our products meet our most knowledge at the time of writing this data sheet. We are not responsible for any possible negligence in handling. Compliance with all laws, including those in the protection of industrial property rests solely with the users of our products.
