1 Features

1 - 1 EBVZ-D6V, EBVZ-D9W

- > Small installation footprint, similar to other household appliances
- > A combined stainless steel domestic hot water tank of 180 or 230L and heat pump for easy installation
- > PCB board and hydraulic components are located in the front for easy access
- > W-LAN module and cartridge compatible
- > Bi-zone allows temperature monitoring for 2 zones. Connect underfloor heating to radiators to optimise efficiency

Daikin Residential Controller (optional)

Voice control

1 Features

1 - 2 EBVH-D6V / EBVH-D9W / EBVX-D6V / EBVX-D9W

- > Small installation footprint, similar to other household appliances
- > A combined stainless steel domestic hot water tank of 180 or 230L and heat pump for easy installation
- > PCB board and hydraulic components are located in the front for easy access
- > W-LAN module and cartridge compatible
- > Integrated back-up heater choice of 3, 6, 9 kW as well as back-up heater less models are available

1

Daikin Residential Controller (optional)

Voice control

	Remark			Voltage: 230V / Max. current: 100mA / Min. 0.75mm ²				
For connection with optional	Quantity			4				
	Remark			100 mA, minimum 0.75 mm ²				

(1) Operation area is extended to lower flow rates depending on operation mode - refer to ESP curve. |

(2) Based on a dT of 45 K |

(3) Including piping + PHE + back-up heater; excluding expansion vessel |

(4) Measured with a pressure drop of 10 kPa in the heating system at an operating condition of leaving water 47-55°C in a room with an ambient of 20°C. DB/WB 7°C/6°. |

(5) For more details, see operation range drawing |

(6) 4 pole 20 A curve 400V tripping class C (refer to wiring diagram) |

(7) Above mentioned power supply of the hydrobox is for the backup heater only. The switch box and the pump of the hydrobox are supplied via the outdoor unit. The optional domestic hot water tank has a separate power supply.

Notes

- (1) PCB that provides additional output connections: · ·
 - (a) Control external heat source (bivalent operation).
 - (b) Output remote ON/OFF signal space heating/cooling
 - (c) Remote alarm output
- (2) Additional relays to allow bivalent control in combination with an external room thermostat are field-supplied.
- (3) PCB to receive up to ·4· digital inputs for power limitation
- (4) Data cable for connection with PC.
- (5) Only 1 remote sensor can be connected: indoor OR outdoor sensor.
- (6) Heating only and bizone indoor unit
- (7) This kit is mandatory for the UK models.
- (8) Only ·EBV(H/X)*· models allowed.
- (9) Multi-zoning wired controls
- (10) ·EKRTETS· can only be used in combination with ·EKRTR1·
- (11) The backup heater capacity depends on a user interface setting.

Remark

Other combinations than mentioned in this combination table are prohibited.

5 Capacity tables

5 - 1 Domestic Hot Water performance

EBVH-D6V / EBVH-D9W / EBVH-UD6V
EBVX-D6V / EBVX-D9W
EBVZ-D6V / EBVZ-D9W

Heat-up times

Notes

1. Time the indoor unit (**heat pump only operation**) requires to heat up the domestic hot water tank from 10°C to the indicated temperature.

See the operation range for maximum domestic hot water tank temperature during heat pump only operation.

Model name	Heat-up time domestic hot water tank until 45°C
ERLA(11/14/16)DA(V3/W1) + EBV(H/X/Z)(11/16)S(U)18Dj(6V/9W)	·62· min.
ERLA(11/14/16)DA(V3/W1) + EBV(H/X/Z)(11/16)S(U)23Dj(6V/9W)	·56· min.

Selection guide for the domestic hot water tank volume

- (1) $V_{eq\ 40^\circ C}$ = the amount of water with a temperature of 40°C that can be tapped when the domestic hot water tank is heated to a certain temperature, and the temperature of the cold inlet water is 10°C.

If a higher daily $V_{eq\ 40^\circ C}$ is required, then additional heat-up cycles are required within 24 hours.

See the operation manual for more information.

Notes

- (1) According to EN16147.
