Product codes can be found in product data sheet tables. The codes provide some basic information about the product while a partially filled configuration code contains complementary information about the detailed specifications. When placing an order, product codes should include the fully completed configuration part. The configuration code part should be placed after the main product code. The main product code and configuration part will appear as shown in the example below:

Construction of electric heater configuration code:

WLTRG056048

PRODUCT CODE
(located in the table for the product)

K916E1K4BM

CONFIGURATION CODE
(supplemented by hand)

Example Configuration

K 916 E1 K4B M

Package code
K - carton box

Colour code

Connection code

Heating element code

Type of heating element cable code

Epoxy primer

E - Code of epoxy primer is an extra processes.

WLTRG056048 K916E1 **E** — *Extra processes or additions code*

Legend

Available in chrome finish.

Radiator available in a "water" version.

Radiator suitable for dual fuel connection. Electric heating element can be installed.

Connection types dedicated for this radiator. The icon shows the flow and return connections for the radiator as well as the thermostatic valve and heating element position if applicable.

Suggested heating element power output for electric and dual fuel versions.

Weight.

Capacity.

Available in Chrome finish.
